Activity (15 mins)

Organization

Servers (black) play into the red player's feet (attacker) who receives and passes into the target goals for 2 points, if they cannot go forward, they can return the ball back to the server safely for one point. (Servers keep the attackers score). Defenders defend as they normally would in a game and if they steal it, they get a point for scoring in any of the 4 targets. After 30 seconds, defender and attacker switch roles. Play straight away on the transition. Once both players have attacked, they swap and become the servers. Once every player has attacked, the 2 players with the highest amount of goals play against each other. Once that is done, the winning players from each square form a group, as do the second, third and fourth placed players and play again.
